Solve mysteries and find fortunes with the all-new GO-FIND 44 by Minelab — a compact detector for beginners that's big on value. With its three Find Modes, Treasure View and Easy-Trak technology the GO-FIND 44 will have you detecting like a pro in just minutes. And recovering more finds time after time. It's the perfect detector to ignite your passion for detecting whether you're searching on land or in the water.

#### THE SMART DETECTOR CHECKLIST

COMPACT: Size Matters. Simply unfold and away you go.

LIGHTWEIGHT: 20% Lighter\* – Detect all day. And the next.

EASY-TRAK: From parks to beaches. Just set and go.

SMARTPHONE APP: Remote control. Now that's handy.

COIN ID MAGIC: Show me the money. Even if it's buried.

TREASURE VIEW: Trash or treasure? Know before you dig.

BLUETOOTH AUDIO: Wireless detecting? Music to your ears.

\* Based on similar competitor offerings

**FIND MODES:** Icons flash to tell you what you've found. You can even tell GO-FIND what sets of objects you want to target by selecting from three pre-set modes.

## COIN ID MAGIC - SHOW ME THE MONEY. EVEN IF IT'S BURIED.

Even though you're detecting miles away from anywhere, you can stay connected with the GO-FIND app. Imagine listening to your favourite tracks while you hunt. It's possible with the GO-FIND app, which is perfectly in tune with your detector.

What's more Coin ID Magic helps you identify what type of coins you have found — even while they're still buried in the ground. GO-FIND 44 with smartphone app: Welcome to the future.

### TRASH OR TREASURE? KNOW BEFORE YOU DIG.

When it comes to detecting, there's really only two things you want to know: is it trash or is it treasure? So with this in mind, Minelab designed the GO-FIND to feature the amazing Treasure View LEDs, which light up and change colour to help you identify what you've found before you dig.

Green lights indicate non-iron objects like coins or jewelry, while red lights indicate iron objects such as nails or keys. GO-FIND 44 with Treasure View: It's detecting made simple.
